The Dom Kino channel is scheduled to launch in Russia in the summer, RIA Novosti reported. The name for the new TV channel was chosen among the users of the social network "VKontakte". More than two million users took part in the voting. According to the website, the project will be distributed in Russia, as well as the CIS and Baltic states. However, according to the site, the "VKontakte" project will not duplicate the functions of the social network Facebook. "We won't have a major competitor to Facebook, because VKontakte is a full-fledged social network," VKontakte spokesman Vladislav Tsyplukhin commented to Adindex.ru. - While on Facebook you can only find your friends, on our network, users can find everything - from communication to music, from games to videos. Users of the social network can publish photos, music, videos and other files. They don't have to download them to their computer, which saves time and simplifies communication. You can also create lists of your favorite friends and groups on social networks. In addition, it is possible to lead a video blog and comment on other users' posts. After a person has created his page, he needs to come up with a password and login, which will help identify him. The login is a set of characters: upper or lowercase English letters, numbers, punctuation marks, and spaces.
