Quote I made several calls to tech support and got the following answers: 1. If it's a regular phone and not a smartphone, it's not a problem. 2. No need to reset. 3. no need to flash it. 4. You have to reset to factory settings. 5. Run the command `AT+CMGF=1` in the console to delete all records of the SIM-card. 6. Run in the console the command `AT^SIP?PASSWORD=12345678`, where 12345678 is the default password that was set on the phone. And that's it.
