Programmable workspace is a layer of automation of a traditional drawing session. The AutoLISP language and several libraries for application and workspace development have been created. AutoCAD is a programming environment designed to be used in conjunction with Autodesk applications such as AutoCAD, Inventor, Plant3D, and Revit. AutoCAD LT AutoCAD LT, Autodesk's entry level product, is an entry-level, easy-to-use AutoCAD-based drafting and CAD suite. It can be used for free without a subscription for up to two users, but is otherwise for sale. The license is for the entire system, not for individual AutoCAD or other CAD applications. In 2009, Autodesk released AutoCAD LT 2012, a licensed update to the previous release, incorporating much requested updates and enhancements. AutoCAD LT 2012 also allows for Multimedia applications, such as BIMx and Revit Live. In AutoCAD LT 2013, an updated and optimized licensing system replaced the older licensing system. It also introduced new technical enhancements. Barrenjoey Beach, Tasmania Barrenjoey Beach is a beach on the east coast of Tasmania, Australia. Barrenjoey Beach is part of the Cape Barrenjoey National Park. The name Barrenjoey comes from the Aboriginal word for 'twenty-five' and refers to its geographical position on the north-east coast of Tasmania, which is approximately halfway between the north-west corner of Tasmania and Cape Bruny. Geography The beach is approximately 2.5 kilometres long, and the terrain is fairly flat, with rocks jutting out from the sandy shore. The beach is fringed by rocky headlands and the waters of Oyster Harbour are navigable. The Mount Field National Park () lies immediately to the south of Barrenjoey Beach. History The beach is known to have been occupied by the Awabakal and/or Warrambool people who had inhabited the area for thousands of years. The Western Railway constructed a swing bridge across Oyster Harbour, linking the Hobart township to the village of New Norfolk on the island of Bruny in the late 1800s. By the early 1900s the railway had reached Barrenjoey, allowing residents and visitors to reach the area. Fishing and boating was the main activity of the local inhabitants. Commercial fishermen such as Ernest Polley and Henry Parkes migrated from the west to Oyster Harbour, fishing the Oyster Harbour and Oyster Cove areas with a crew of 7 to 10 men. Smaller boats were also used for fishing, most notably the Pig and Mouse named by Ernest Polley after the 'baby' and 'senior' pig who died on the trip
