Let's take a tour around the Tomb Raider universe and find out, who are the "Lazarus" featured in the game? The game reveals that the character was born in 1335 on "Golden Finger Island" and was both a scientist and adventurer, having traveled to many exotic locations and even traveled to the bottom of the ocean to search for the lost treasures of Atlantis. The main character of the game is Lara Croft, whom the player assumes the role of in the game. While Lara is strong and a good fighter, she is also very smart and has a wide-range of skills. Lara is armed with a bow, arrows and a pistol (later weapons will be added). The game also gives us the information that the main character's father, Croft Sr., was a famous explorer who took many treasures on adventures and died when Lara was very young. Also mentioned is Lara's companion, Philip Da Costa, who was at the same time a great adventurer as Croft Sr. The games claims the main character is a replica of her father and can be said that she is a "Croft". Lara's mother has died, but her grandfather is still alive. He is the player's guide in the early part of the game, but during the main storyline he dies and his daughter does not know who she is. The main characters only ally in the game is Sheva Al Baker, who is always accompanied by her loyal pet, a tiger. Sheva is an expert marksman and also knows how to use weapons in combat. The game tells us that Lara has inherited some of her father's genes, her mother's looks and personality, as well as some of his special abilities, such as climbing. She is a female who, besides fighting, also has a lot of puzzle-solving skills.
