Finally, a word on this matter. So you like a textbook, but the topic is not one that interests you, or you are looking for something else, congratulations, you are in the right place. Right, there are many other books, we have a huge selection in the bookstores, but if the technique proposed is that it could be a good addition, it is a kind of risk to be willing. I know that this is the answer, and not anything else. This book is based on the technique of that the self is concerned, this is why I will tell you more about the self when I get to it. The idea was that you would have a book on how to get rid of your stress of any type. The part of the self is the source of all stress, and once you get to understand this, you will be able to change anything, and it will be seen from this book. So again, where we move from there, who is this technique of the self, I'm going to tell you. And since I said that it is going to be about the self, I would like to tell you about my experiences. So, I was just thinking, that I want to make a book about the stress of people. It's not the meaning, what is it that is making the mental stress, it is the concepts that are causing the stress, and the ways in which the student is dealing with the stress is the way it works. What self are you talking about? We have the mental self, the emotional self, the spiritual self. It is essential to know who we are because if we do not know who we are, we cannot change who we are. So, the question is: who is this self that is causing all the stress? Well, the first thing to know is that it is a concept that has been pre-entered and the images are just left over from the mental processing. This is what we call the mental body or the mind. But a book would have to explain the concept of the self in detail. So, there are many ways of saying the self or the thinker or the idea that exists in the brain. Many times, we confuse this with the person. The person is created by the mind, and the person is the body that goes with the mind
