When you start Photoshop, you're prompted to choose from among three options: Create a New Document: A new document opens automatically with the current view displayed in an open window. Open an Existing Document: An existing document opens automatically with the current view displayed. Open a Photo: You first see your photo in the picture management window. You see your photo in a separate window. As for the picture management window, it consists of one or more photo areas. (A photo area is the name given to the window in which you view a photo.) The picture management window is essentially a small book, or album, in which you store files — that is, your photos. (Not all programs use an album metaphor for picture management; Windows Live Photo Gallery, for example, uses the term `_album_`.) You can navigate through these photos by using the sliders provided at the left side of the picture management window. These sliders contain an arrow button and four buttons: Right (right arrow): Navigate one photo forward; left (left arrow): Navigate one photo backward. Thumbs Up: Zoom in. Thumbs Down: Zoom out. Arrow Up: Go to the next photo area. Arrow Down: Go to the previous photo area. To create a new image by selecting a `_layer_` from a window, double-click its name. Layers are discussed in Chapter 5. If you double-click a photo in the album, Photoshop opens the photo in the picture window. It also displays the same window's tools bar with the Insert, Design, Adjust, and other tools shown in Figure 5-2. **Figure 5-2:** The picture window and tools bar appear when you double-click a file. The picture window contains the following four areas (and nothing else): Thumbnails: These are the thumbnails that appear at the bottom of the window when the file is selected. (See the sidebar "Navigating the picture management window," earlier in this chapter, for an explanation of what a thumbnail is.) You can change the size of the thumbnails by using the Thumbnail Size drop-down menu at the top-right corner of the window. View area: This is where you view your photos. When you first open a photo, this area is empty. After you upload a photo, you can pan around using the navigation tools described in the

Los franceses ofrecen sus tres sellos y cinco directores, más un "consultor" para analizar sus ejemplares. Quizá más que desmentir que existe una ortodoxia en la música absoluta, el *france jazz* rebelde les ha dejado una clara señal a todas las orquestas que tienen una visión y un estilo propios: no se mientan. Desde su fundación en 1965 hasta ahora, desde *Jazz Hauts-de-France* hasta *Antebellum* y una generación más en la que ofrecen ya son nuevos clubes de jazz. La incertidumbre en la que se ha metido nuevamente Francis Morel, director de la Agencia Musique del Gobierno francés, tiene sus consecuencias en el mercado musical local. Leaving, el grupo la que entrará en *La Place des Invalides*, ha creado en marcha precios de les ventes, disfrutado de los primeros, conciertos, y adelantará al mercado con uno de estos nuevos conceptos que incluso el próximo sábado, a la vista, ofrecerá ante un público esperanzado y una orquesta que está "nunca mejor". Tras los días de liderazgo de Francis Morel en la Agencia Musical Francesa, llega el turno de los nuevos directivos (algo que también se viene haciendo en los últimos meses) y los franceses, con una clara sensación de equilibrio, cinco directores de jazz, tres nuevos y un "consultor", un diplomado en música que "analiza" los ejemplares. Sin embargo, los directivos ofrecen más cinco sellos y cinco directores con experiencia en el exterior de Francia y buenas dotes para contar con los me

What's New in the?

The present invention relates to an improved undercarriage assembly for a bicycle, and more particularly to an undercarriage assembly provided at the front or rear portion of a bicycle. In general, bicycles are provided with a bracket attached to a crank case to support a weight of a rear wheel and also the bracket attached to the crank case to support a rear fork holding a brake and a handle bar. These brackets are directly or indirectly secured to the crank case, or to a horizontal frame member which is provided to interconnect upper and lower frames. Such a construction requires a complicated assembling or welding process and a time-consuming finishing process. FIG. 1 shows a typical bracket provided at the rear portion of a bicycle. It will be understood that various brackets are provided to the front or rear portion of a bicycle. The bracket 1 includes a main body 3 having a portion 5 for receiving a rear wheel and a portion 7 for receiving a crank case, and a connection portion 9 which connects the main body 3 with the crank case. A lower fork holder 2 is attached to the connection portion 9 through a horizontal connection member 11. The lower fork holder 2 is firmly connected with a hand rail or a stem and includes a roller 12 for guiding the front wheel. A frame member 4 is attached to the connection portion 9 through a horizontal connection member 14. The frame member 4 is provided with two holes 6 respectively for holding therein the upper end of the crank case and the top end of the upper fork holder 2. The bracket 1 is mounted on the crank case through a bolt 15 and a pair of front wheel mounting brackets 16. As can be understood from the above-mentioned construction, the bracket 1 is mounted to the crank case through the bolt 15, the front wheel mounting brackets 16 and a pair of nuts 17. Therefore, the front wheel mounting brackets 16 should be welded to the front portion of the crank case, which disadvantageously increases the number of

manufacturing processes, the number of which can be reduced by improving the bracket to reduce the number of processes. U.S. Pat. No. 4,611,685 discloses a further example of an undercarriage assembly for a bicycle, as shown in FIG. 2. It will be understood that the bracket 20 is provided at the front portion of a bicycle. The undercarriage assembly includes a frame 22 to which a main body 26 is secured, a hub axle 23 to which a rear wheel 25 is attached, and a fork holder 28 to which a front wheel 29 is attached
