Getaway Island is a city builder with a difference. It's designed to be played solo, or for up to 4 players. Build bridges, shops and hotels to make your own city, or just focus on enjoying the island's various attractions. Features: - A variety of game modes from single-player scenario to competitive co-op - Up to 4 players online or offline - Numerous local and online multiplayer modes - Night-time mode - New graphical updates - Free updates with the release of each new island - Full Steam integration - Great support and community - Playable across all common operating systems from Windows to MacOS - Playable across all Windows and Mac platforms from 32-bit to 64-bit - Playable in High, Medium or Low graphic mode - Unsupported languages in the Windows version Old News We are pleased to announce a new update for Getaway Island, coming up on the 14th of April, 2014. We have recently added a mode to Getaway Island called "the fog". You can now create a fog surrounding your buildings and friends. The basic mechanics of this mode are: - Smaller number of house plots - Higher cost of each house plot - Buildings can be pushed around on the map with mouse or WASD keys - Only buildings with functional warehouses can be in the fog. They will be able to produce the fog. The Fog mode will be up for everyone on the 14th of April, so get ready to experience the fog! Getaway Island Update Notes V2.8.2 is our first update after a month long absence. Since that, we have been hearing your suggestions, and we have managed to fix a few bugs in the "Gathering City" scenario and feature the first scenario of "Castaway Island". Getaway Island is still available at a bargain price of \$1.99 until April 10th. You can learn more about the game on our website, and there is more information available on the most popular social networks (Facebook, Youtube, Twitter, etc.). We would like to thank you for your support! Update notes: V2.8.1 is the first of many upcoming updates coming to Getaway Island. We have decided to reduce the price to make it easier to own this game. We hope you enjoy it as much as we enjoyed making it. Getaway Island and the most beloved "Castaway Island

Space Simulator is a realistic space flight simulator game featuring high-quality models, hi-res textures, IBL shaders, and a full-scale Solar System running on a proprietary purpose-built (double-float precision) physics library to create a better, faster and more realistic space flight simulator. Gravitational forces, including moons and distant celestial bodies, orbit instabilities, resonances, etc. are calculated with utmost accuracy. The physics solver computes and predicts real n-body trajectories that vary in real time, allowing -for the first time- the player to design and fine-tune very complicated orbital maneuvers, eg. orbital slingshots, etc. With the dynamic loading textures and multi-threaded physics running on GPU cores, the game reaches at 50-60 fps on most PCs with modest RAM requirements. We are also implementing VR support for a fully immersive flight experience as well as support for all major joysticks and flight controllers. CONTENT Space Simulator features a mix of high quality Steam specific missions while also having a legacy mode with all the missions, models, etc of the mobile version included for the convenience of our mobile players. Steam Specific Missions: (Early Access) Chapter 1: The Apollo Days. Featuring a growing number incredibly detailed and realistic Apollo Program missions starting -at launch date- with Apollo 8 lunar orbit missions. In the following months, we will complete all relevant missions in the Apollo Program. Included also is the mobile version content with: • Project Apollo Space Simulator features the complete Apollo 11 program missions. Players can choose to play particular missions or the entire Apollo 11 program from beginning to end: launch the Saturn V from Cape Kennedy; perform Trans-Lunar Injection, transposition rotation and docking; land on the Moon; power through the lunar ascent and rendezvous; and finally return back to Earth with reentry and splashdown. • Space Transportation System Space Shuttle fans can also enjoy a wide selection of Space Shuttle missions: launch from Cape Kennedy; rendezvous and dock with the International Space Station; return to Earth with reentry and play the final landing in day and night scenarios. • Space Launch System Space Simulator also includes a number of contemporary spacecrafts, such as the SLS (Orion).We also plan to include SpaceX vehicles in the near future. • Custom Free Roam Missions Space Simulator is a realistic simulator of the entire Solar System with all its planets and major moons. What's new:

As with the previous instalment, there are numerous hockey styles here. You can say Half Moon Lake, the preferred method for Vancouver Canadians and the team found by DLC in the Western School Division Ice Hockey. Half Moon Lake assists you to play with shooter controls for both players and referees. Opponents have a single control which allows them to shoot, pass, block or tag the puck. It is important to note however, that fans are also able to choose which controls to use for players, with the classic ball and stick elements returning to the game. You can also assign your own unique controls. Half Moon Lake is also possible for choosing, where it allows you to race across the ice and strike your opponents with a goal and several utility equipment like a rubber band. This mode is perfect for novice players and those who do not feel confident using the stick and ball. Another new feature include in the Half Moon Lake is the addition of International Ice Hockey, and a set of International Teams. The International Teams allow you to play a week's worth of matches against teams from different countries from around the world. These teams consist of competitive and friendly games, where you can face semi-professional teams and amateurs from countries such as United States, South Africa, and United Kingdom. It is important to note however, that Canadian domestic ice hockey and play an important part within the international teams. The inclusion of these teams within the game adds the ability to take part in a large amount of international competitions. As with the previous instalment, the NHL IP license also allows you to play with NHL teams directly using a NHL roster. Rugby League Team Manager 2 comes with six different Rugby League teams, from Super League, National, and Rugby League Cup games. Each team comes with a unique set of fifteen different Super League and Cup teams, such as St.Helens, Sheffield Eagles, Wakefield Trinity, Bradford Bulls, Warrington Wolves, and Widnes Vikings. In addition to this, you can also play with the Leyla Celtic Rugby League Academy and St Pauli, the German team in Super League. Since the previous instalment was released, a number of different DLC have been released, with another new feature being league seasons. This will be used to detail the number of games in a given season, where games will count in a standings that can affect season play-off. Most notably, conference play-offs are now taken place. The number of games in a season was previously decided for each
