These results were in agreement with the

results of a previous study by Mukai and co-workers \[[@ref8]\] that reported values of viscosity, solubility, water-holding capacity, and cohesiveness of cooked noodles and cooked rice. The differences in both physical and textural characteristics between cooked noodles and cooked rice may be attributed to the properties of wheat flour as a matrix, which is rich in protein. Cooking has been reported to affect the functional properties of rice \[[@ref18]\]. However, in the present study, cooking had only a limited effect on physical characteristics of raw NS samples, with only a slight decrease in the hardness and chewiness of NSs. The only significant difference found was in their ability to hold moisture. Higher TPCs of cooked samples indicate the possibility of more effective utilization of dietary fibre and antioxidants. The dietary fibre in the NS samples was between 38.39 and 43.55%

in the present study. The mean value obtained for cooked rice (38.46%) was similar to the value reported by Adwoki and co-workers \[\[@ref19]\]. The values reported by Mukai and co-workers \[\[@ref8]\] for cooked noodles were 37.18 and 33.93%, respectively. The results of the present study show that there were no significant differences in TPCs between cooked and raw NS samples. These results indicate that cooking of rice flour does not significantly affect the TPC. This finding was supported by the results of a previous study by Wang *et al*.*.

\[\[@ref20]\], who reported that heat-treated rice diets did not have any effect on their TPCs. The total dietary fibre in NS samples was relatively high. This result is an indication of the relatively high percentage of dietary fibre present in NS samples. A significantly higher TPC has been reported in oat flour than in wheat flour \[\[@ref15]\], and so, a similar

phenomenon was observed in the current study. In addition, the TPC of cooked NSs was 0cc13bf012

1:32 Stray Cats: The Music, The Myth, The Legend Stray Cats: The Music, The Myth, The Legend Stray Cats: The Music, The Myth, The Legend Meet the greatest rock 'n' roll band that never was. As improbable as it may seem, Stray Cats has actually been around for nearly 40 years, while the music they made is all around us in so many ways. We got the band's guitarist on the line. --- Support The Young Skeptics: Follow The Young Skeptics: Tumblr: ---- Songs in this video (of course) Do Not Cross the River Ooh Ooh Baby Mama's gonna take you to the park and feed you ice cream Never My Love Headin' for the Storm RiseUpTakeDown (This tRYING to take) The name of this band... is Stray Cats! You're going to see footage of "Alive and

Kicking" and "Stray Cats: The Legend", a video I found online using google, it's not my work it belongs to it's rightful owner.

As for this video. I've decided to do a "Special Edition" of "Ties That Bind" because I've found another version of "Stray Cats: The Legend" that's a little bit different from the one I used. You can watch the original version with all of the original video footage and the Stray Cats:

The Legend part here: My recommendation for fans of Stray Cats! by the way guys, the city, the night, the myth, the legend. This entire clip took place in the middle of New York city. It started at 7th avenue where the historic Schmidlapp building (20 feet and back) still stands at 7th avenue and 35th street, then quit the Eden rockclub at 15th avenue, Lincoln road, then it was the show at the original Sycophants club, at Monmouth and 44th street at
