Summary: Numerous reasons for the demise of the traditional pediatric department in the city of Saint Petersburg are studied. The empirical study is based on the analysis of the pedigree of the clinical and laboratory data of over 1400 children treated in the department for the period 1991-2012 and includes the analysis of the clinical manifestations of the disease, the development of the disease, the staging, the frequency of the use of therapeutic methods and the results of the treatment.
