Cracking Adobe Photoshop is not as straightforward as installing it. It requires a few steps to bypass the security measures that are in place. First, you must download a cracked version of the software from a trusted source. If you don't have the software on your computer, you may be able to find it online. There are various websites that offer this software. The only problem is that you have to pay for it before you can download it. If you are willing to download the software, you can do so by clicking on the download link provided on the software's website.

"After awhile I found what I wanted to do in an image, and got to it. Changing brushes and swiping the paintbrush over the canvas to create new strokes was nice and easy."
That ability is now built into Photoshop CS6.
You can paint with a brush set up by Photoshop just as you can with a paint program.
Same for brush adjustments – easy to make and adjust a brush's size, shape, and color.
A new feature is the ability to paint with the mouse. Drag a cursor location from the painting tool itself with the mouse, and your cursor will quickly snap to that location.
You can do this with any tool, not just a brush. You can also now paint in a selection like you've been able to before, but select a larger area by holding down the shift key while you paint.
Finally, there are a bunch of other new features and improvements in the Update CS6 that are worth a look when you upgrade.

You'll find the list online.

Can you paint with Gimp? Yes – Gimp Painter is a plugin that enables the Paint tool to function like Photoshop. The Plugin is also available for GIMP 2.8 and later versions.

I'd say that the biggest change made to the CS6 release is the support for the large files sizes such as the Raw image formats (.NEF and *.RAF extensions). The old Lr version couldn't keep up with some of the huge files. Which is why the developers have made Lr work together with Photoshop CS6.

You may need to download the CS6 DVD and run the toolkit installer to get all the tools. You might also want to try out Photoshop CC.

People also tend to forget that they don't need to own a pc for this. One could use the ipad or ipod touch... or even a simple phone. The ipad already has some decent photo editing apps. I suggest downloading an older version of Photoshop if that is your plan.

When I started my series on the difference between Canon and Nikon I was well acquainted with both. But now after 10 years in the biz I can't tell the difference between them. All the cameras that I use as a pro are the same to me. But in this hobby segment where you are taking photos for fun, from your phone, the differences should be quite visible. Thank you Dan and thanks for the follow-up!

Have a nice day.

We've put together a Photoshop Crash Course of sorts that's a great way to learn how to use the various tools within the app. There's a brief look at each tool, the buttons to use to invoke them, and a few screen shots to show you exactly how to use them. If you want to take things slowly and learn how to use each tool in Photoshop, you can always go through this printable instructions PDF or we've rendered it for screenreaders , multiple formats to enjoy the experience from any device. We'd suggest sticking with a single input medium — like paper or screen — but some designers prefer all tools and data together, others prefer multiple apps, and still others may prefer all of these and more! You've tried in-app tutorials, but tutorials don't account for issues like hardware acceleration (necessary for performance and battery), or OS changes like feature deprecations or security updates. We can't provide the level of service or setup that a full-time Adobe CS5.x trainer can, but we can provide a helpful reference. We provide in-app resources that include topics like color management, layer operations, image adjustments, and more. *We can't cover every aspect of Photoshop—what you learn will come from exploring on your own. And the goal of this guide isn't to be a comprehensive tutorial, it simply gives you a handful of the best tools in light of the changes we've made. We'd love to hear your thoughts on what you'd like to see us cover next.* 933d7f57e6
