Open the Colors tab on the side that you'd like to apply the color to. In this case, I want to make the background a darker shade of blue. Create a new layer and, while holding the Option key down, select the Color Picker at the bottom in light blue. Go to the top of the color picker and scroll until you see the #33's box. You can click on it to select it. After clicking on that color, go to the image where your background is and drag a selection all the way around the shape you want to apply the color to. If you need to make the selection smaller, hold down the Option (PC: Alt) key while making the selection. Now, click on that layer and you should see a box that looks like this. After you adjust all of that, you can select the image you'd like to apply the effects to. In this case, I'd like to make the bottom image brighter. This can be done by either using the Adjustment Layers window or the Adjustment panel. Open the Adjustment panel by going to the Window menu or clicking on the tab at the top of the window. To make this image brighter, you'll need to go to the Brightness/Contrast slider. Grab the slider and slide it to the right until you see where the image becomes brighter. Once you're familiar with the basic tools, it's time to start playing with them. An acquaintance of mine has been a Photoshop user for years, and after using Apple's iPhoto and Lightroom, he finally decided to purchase the Adobe lineup. However, as a busy photographer and graphic designer, he actually started to search for alternatives to the Adobe products. As a result, he replaced Photoshop with others instead. Photoshop has been updated to offer me more tools and features for image editing without having to buy new software. However, \$599 is still a lot to pay for the quality of Photoshop in use today. For most of the work I do as a graphic designer, I don't need the best possible image editing software. Photoshop is often too complicated for my needs. Thankfully, Photoshop alternative products such as Pixlr, PicsArt and Adobe's AI, already have most of the features I require.
