The present invention relates to a method for manufacturing a solid electrolytic capacitor. A conventional method for forming a solid electrolytic capacitor includes the steps of: a) forming an anode having a dielectric oxide film formed on a valve action metal substrate, with the dielectric oxide film provided thereon; b) forming a conductive polymer layer on the dielectric oxide film provided on the valve action metal substrate; c) molding the dielectric oxide film provided on the valve action metal substrate with the conductive polymer layer provided thereon; and d) forming a cathode. In the conventional method, however, the conductive polymer layer has low flexibility, and hence it is likely that the molding of the dielectric oxide film provided on the valve action metal substrate will not be conducted accurately. During Cohn's months as NEC chairman, the White House has leaked details of his work and publicly slurred him for "undermining" Trump's advisers. Some advisers say Cohn's clashes with other top White
